📍 Angers, 49100

👉  [Matthieu Tremblay](#)

I am an engineering student at ESEO with a background enriched by experiences in Japan and at Airbus. Having worked with various development methodologies (Agile, V-model) on embedded and IT solutions, I value technical rigor, team management, and hands-on projects. I am looking to contribute to the design, integration, and validation of complex systems in demanding environments.

EDUCATION

ESEO Engineering School - General Engineering Program

Major: Embedded Systems

Angers, France

2021 - 2026

Mongazon High School

Angers, France

2018 - 2021

SKILLS

- **Languages & Scripts:** C, C++, Python, Javascript, Java, Bash
- **AI & Modeling:** PyTorch, Scikit-learn, Formal modeling
- **V&V Methodologies:** Robotframework, Cycle en V, Test plans
- **Networks & Systems:** Linux/Windows environments, Kernel, Git/GitLab/GitHub, Embedded protocols (UART, MQTT, HTTP)
- **Soft skills:** Independence, intercultural adaptability

EXPERIENCE

AIRBUS ATLANTIC - Machine Tool Digitalization Engineer - End-of-Study Internship

- Automated management of dashboard deployment for machine tools
- Creation and execution of test plans to validate the solution
- Verification and validation of hardware signals in strict compliance with datasheets (Given-When-Then, Reason Tree)

Montoir-de-Bretagne, France

March 2026 - September 2026

Hitachi Hong Kong - AI and Machine Learning Developer

- Analysis and processing of complex transportation-related data
- Development of a GNN model (PyTorch, Scikit-learn) for fraud detection
- Project manager of a 4-person team using Agile methodology

Angers, France

September 2025 - January 2026

Fortil - Embedded Systems Developer

- C Developer for a V-model project with a team of 8 people
- Embedded C design using the V-model (ISO/IEC/IEEE 29148 standard).
- Integration testing (RobotFramework) and implementation of HTTP communications (C)

Angers, France

January 2025 - July 2025

University of Electro-Communication - AR Fighting Game

- Design of a test bench for the electronic filtering of an augmented reality game
- Integration as the sole foreign member of a Japanese development team
- Final project presentation to Japanese clients.

Tokyo, Japan

July 2024 - November 2024

PROJECTS

- Creation and deployment of my personal portfolio: <https://matthieu-tremblay.com>
- Training an AI model (YoloV8) to detect people in C++
- Development of an ESP32-Cam camera for a robot in C++
- Machine Learning course: data manipulation with Python (Pandas, NumPy)
- International IT sales and business development (U.S.)
- Research report on a magnetic resonance engine, development of a test bench

LANGUAGES

- **French** (native language - Voltaire 822/1000)
- **Japanese** (beginner - B1 level)
- **English** (fluent - TOEIC 850/990)

PERSONAL

- **Sports:** Regular calisthenics workouts
- **Travel:** Asia, Europe
